

# JULY 2024

## A Veterinarian's Role In The One Health Approach

Did you know that there are many avenues a person with a DVM degree can pursue? Veterinarians not only care for pets directly but they analyze disease trends and evaluate therapeutics too. Safeguarding animal health directly impacts human and environmental health.

## World Zoonosis Day is July 6th

Veterinary professionals provide a bridge between human and animal health. They not only keep our pets healthy but make sure our food supplies are safe and prevent spread of diseases.

## Meet our Kennel Managers

Emily & Sue have a passion for loving animals while their owners are away. They ensure every pet in our kennel receives top-notch care and attention during their stay.
