Feline Enrichment: Creating a Happier, Healthier Cat

We have made cats lazy. Young kittens seem to be wild beasts and with age calm down. But this is not what their natural behaviors should be. Learn how enrichment like food puzzles, “hunting” for meals, or even leash walking will tap into their instincts keeping them healthier and happier. If you’ve ever thought “*my cat won’t do that*”, we challenge you to read our blog and broaden your cat’s horizons. Most cats surprise their owners once given the chance!

Unleash your cat’s instincts!

(frunevetmab injection)

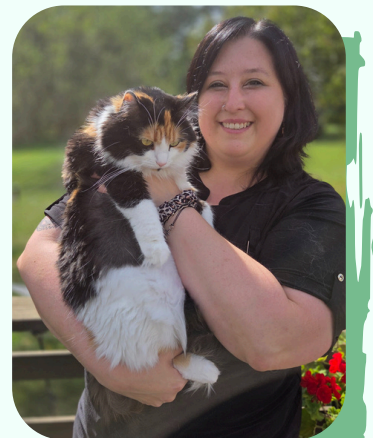

Help cats with Osteoarthritis (OA) pain get back to where they belong

We now know cats don’t just “slow down”, it really means they are experiencing some sort of pain. Improve your cat’s quality of life in their golden years by providing pain relief in a once monthly injection at our vet clinics.

Meet our cat enthusiast Jen!

Jen has been with AACC since 2019. She has a passion for cat behavior and nutrition. With an extensive background in shelter medicine and general practice, she has been dedicated to the veterinary field for over 23 years.
